WASHINGTON, July 21.—The United States has decided to inform Germany that further loss to Americans as a result of submarines in contravention of the principles of international law will be regarded as an "unfriendly act." It will warn Germany of the interpretation it will place on future transgressions of American rights. In the new note the United States assumes that Germany already has admitted the principle that passengers must be removed to a place of safety before destroying unresisting merchantmen. Taking the position, therefore, that the two governments are agreed in principle, the United States views it as incumbent upon Germany to make her submarines conform to the accepted principles of international warfare.

Affidavit Introduced When It Is Sought to Make a Temporary Injunction Perpetual

The case of the Tonopah Extension Mining company versus the West End Consolidated Mining company is being heard today on several motions, the most important of which is by the plaintiff, asking the court to issue a perpetual injunction in place of the temporary restraining order directed against the defendant, restraining it from continuing its winze into territory of the plaintiff.

In this action the plaintiff is represented by H. R. Cooke. The attorneys for the defense are Walter D. Cole, junior member of the firm of Peek, Bunker & Cole, chief counsel for the West End; F. J. Salinsky of San Francisco, and H. H. Atkinson of Tonopah. The allegation by plaintiff was published in a recent issue of the Bonanza. Following is the defendant's affidavit, made by General Superintendent J. W. Chandler of the West End Consolidated Mining company:

I, J. W. Chandler, being first duly sworn, depose and say:

That ever since the first day of October, 1914, he has been and is now the superintendent of the defendant, West End Consolidated Mining Company, and of all its mining operations in the Tonopah Mining District, Nye County, State of Nevada, and that, as said superintendent, has had charge of and is familiar with the mining operations of defendant company carried on in all of its lode mining claims situated in said Tonopah Mining District, and particularly in the mining claim owned by defendant, known as the California lode mining claim; that affiant is likewise familiar with the mine workings of the defendant company extending from the said California lode mining claim into the so-called Egyptian lode mining claim alleged in plaintiff's complaint to be owned by plaintiff. That the said California lode mining claim was duly located upon the 2nd day of July, 1901, and that this defendant company, by grant and conveyance from the locators of said California lode mining claim, became the owner thereof; and thereafter a patent was issued by the United States Government to defendant company for the said California lode mining claim, which patent was dated the 21st day of July, 1904, and now appears of record in Book 11 of Deeds, page 214, Records of Nye County; that under and by virtue of said location and patent the said defendant became, ever since has been, and now is the owner and entitled to the possession of all lodes, veins, and ledges bearing gold, silver, and other mineral-bearing rock and quartz in place, the tops or apices of which are in the said California lode mining claim, and which, on their downward course or dip, so depart from the perpendicular as to extend outside of and beyond the side lines of said California lode mining claim extended vertically downward, and between planes drawn through the end lines of said California lode mining claim extended indefinitely in their respective directions.
